

Aleph Brings Textile Digital Printing to Next Level

Ready for the new edition of ITM Istanbul, the international textile machinery exhibition, Aleph is focusing on innovation to bring the digital printing technology to next level for Turkish customers.

In fact innovation is the key for the Italian Company that is gaining market shares globally. The implementation of technical features and software for the LaForte integrated system is at the basis of the sales increase. In the Turkish market, in the recent period, 3 LaForte Industrial inkjet printers have been sold.

Aleph is taking the occasion of the ITM exhibition to present it LaForte Industrial Fabric, the printer with the highest productive capacity and a guaranteed speed of 540 sqm/h. It targets large scale industrial production and offers high standards of performance over time. During the trade show, Aleph will demonstrate the quality of the printing with reactive inks on cotton and viscose.

At the booth, Aleph is also presenting the LaForte Studio Paper 4K, the sublimation printer designed for medium runs, featuring a maximum speed of 270 sqm/h.

Created in 1999 in the area of Como, the heart of the Italian textile manufacturing excellence, Aleph is now a company with a solid know-how in the construction of printing machines and in the development of supporting software.

From large format textile printers to drying systems, from proprietary software to consumables, Aleph develops and manufactures technologically advanced products for each individual printing process, and offers reliable after-sales technical support services.

Aleph distributes in USA, UK, India and Turkey through reliable partners. For more info, please visit alephteam.com.
