Aleph iconic plotter to be showcased at Fespa 2017 Hamburg

Following the successful presentation at Fespa Eurasia in December 2016, Aleph is continuing its business collaboration with Fespa as registration sponsor of the main event in Europe this year, Fespa 2017 Hamburg. Aleph will be among the exhibitors of the Textile Hall (B6 B560) as textile industry is the main area of interest for the company, dealing with major Italian and international fashion and garment manufacturers.

Aleph will bring to the Fespa exhibition its iconic product: the LaForte industrial plotter for sublimation. Aleph developed this Eco-sustainable digital textile printer, also awarded by EC through the programme H2020, responding to the growing textile manufacturers demand of innovative solutions in digital printing. *“Our aim is to support our customers in their approach to digitalization with a state of the art technology, ready to go, very flexible and ecological. Our Large Format Textile Printers are capable to increase productivity (600 sqm2/h) by enhancing the printing quality”* said Alessandro Manes, Aleph CEO. Thanks to an innovative vacuumed rotary belt (patented) there is no need of adhesive for transportation of the paper avoiding a huge use of chemical adhesives.

While the Company is clearly focused towards reinforcing current markets and opening new ones, Aleph is strongly committed in assuring that current customers are fully satisfied with the expected features with LAFORTE®. In addition to the textile industry Aleph will target the laminated paper sector for the production of laminated floorings and panels for

furniture and the printing for visual communication using pigment inks.

"Our project meaning goes beyond our targets for turnover increase or larger customer portfolio: It is about consolidating Europe as a key world player in the textile area, where in the last 20 years the productions has relentlessly gone off-shore, specifically in the disciplines of textile printing /transfer. Our new asset enables European customers to acquire new capabilities in flexibility and speed, with lower operation costs: this will lead to a better position when competing with traditional developing countries such as India and Brazil, etc" continued Alessandro Manes.

While the number of LaForte installed in Italy and abroad continues to increase and client feedbacks are very positive, Aleph R&D department is now developing a new plotter for a new maximum width of 3200 mm and a new model for pigment inks to be ready after summer.

Created in 1999 in the heart of the Italian textile manufacturing excellence, Aleph is now a company with a solid know-how in the construction of printing machine and in the development of supporting software.

From large format textile printers to drying systems, from proprietary software to consumables, Aleph develops and manufactures technologically advanced products for each individual printing process, and offers reliable after-sales technical support services.

Aleph distributes in UK, India and Turkey through reliable partners. For more info, please visit alephteam.com.
